

BIBLICAL QUOTATIONS, ALLUSIONS, AND VERBAL PARALLELS

This list attempts to account for biblical expressions in the Book of Mormon in a systematic, comprehensive fashion. Parallel phrasing has been evaluated by several criteria: the number of significant words in common, syntactic complexity, distinctiveness, sequence, and context. Verses connected solely by similar ideas have been excluded, as have generic allusions to biblical narratives. In this list, Book of Mormon phrases are usually correlated with only one biblical antecedent, either the closest match or the first occurrence if the identical phrase appears multiple times in the Bible. (Some biblical verses have more than one distinctive phrase independently alluded to in the Book of Mormon.) Biblical phrases appearing seven or more times in the Book of Mormon are generally regarded as conventional usages rather than deliberate allusions. Similarly, phrases in the Book of Mormon that occur more than seven times in the Bible are treated as biblical idioms. The goal has been to identify biblical phrasing that was intended by the author (or translator), which readers familiar with the King James Bible might be expected to recognize. A supplemental list of representative conventional usages appears at the end.

boldface = quotation; “see” = OT precedent for a NT source of BoM phrasing; “+” = NT phrasing common to multiple Gospel accounts
